Objective

It's my mission and passion to utilize today's technologies in only the most visually captivating, creative, and interactive mediums possible to give your company's hard work and great ideas the market and profits it deserves. I love bringing a scientific approach to web development, iterating upon the fundamentals of human cognition, emotion, and behavior to create digital experiences people enjoy coming back to again and again. I excel in fast-paced environments, working with teams, creative design/problem-solving, and learning on the go. Let's collaborate and build something!
